重要通知

POCKIT™ Central Premix Reagent 系列產品

Notice No.: N-260122-01-I-01

親愛的客戶您好：

感謝您長期以來對瑞基產品的支持與愛用。我們始終致力於提供具備實驗室等級準確度、同時平易近人的分子檢測解決方案，讓有需求的使用者皆能輕鬆取得。POCKIT™ Central 為本公司廣受好評的 PCR 系統之一，透過自動化設計大幅簡化分子檢測流程。

為持續提升產品使用體驗，我們依據使用者回饋調整 POCKIT™ Central Premix Reagents 之包裝形式，由現行的「條狀冷凍乾燥試劑管」改為「8支獨立冷凍乾燥試劑管」（Table 1）。此項調整可提升操作效率，並進一步降低污染與人為操作錯誤之風險。

本次包裝變更將適用於所有 POCKIT™ Central Premix Reagent 系列產品，自 2026 年中起陸續進行轉換，您可能於不同產品品項或不同批次中收到不同包裝形式之產品，敬請留意。

Table 1. POCKIT™ Central Premix Reagent 包裝變更

現行	新包裝
	
條狀冷凍乾燥試劑管	8支獨立冷凍乾燥試劑管

Important Notification

POCKIT™ Central Premix Reagent Series

Notice No.: N-260122-01-I-01

Dear Valued Customers,

Thank you for choosing GeneReach and our products. We are dedicated to making molecular testing affordable and reachable with the same laboratory-grade accuracy for everyone in need. **POCKIT™ Central**, one of our most popular PCR systems, utilizes automation to make molecular testing easier than before.

To keep advancing, we are making it even simpler by consulting users' feedback and adjust the packaging of **POCKIT™ Central Premix Reagents** from current "strips of premix vials" to "8 individual premix vials" (Table 1). This change will bring you a more efficient workflow with reduced contamination risk and error.

The change will take effect successively on every single item of **POCKIT™ Central Premix Reagent Series**, starting from mid-2026. During the transition period, you may receive both formats among different items and different batches.

Table 1. Packaging change for POCKIT™ Central Premix Reagent

Current	New
 <p>strips of premix vials</p>	 <p>8 individual premix vials</p>
